Mr. Jack G. Wiersma
General Distributor
1530 42nd Street, S.E.
Grand Rapids, Michigan

Dear Jack:

We here at Rosebrook Stock Farm, Moline, Michigan have used Fossil Flour now for about six months and we would like to report to you our findings as of this date:

1. We have never noticed in so short a time results with a mineral supplement.
2. We have complete odor control in all our barns and this is especially noticeable in our calf barn.
3. We have seen a definite sheen in the coats of our animals, and this goes a long way toward their appearance.
4. The general health of our animals seem to have improved.
5. We have complete fly control with Fossil Shell Flour and Kleen Bin, which we recommend for a complete program.
6. After calving we used to have an occasional cow which had to be treated by a veterinarian for a yellow mucus. Since using Fossil Flour, we have not run into this trouble. We hope it continues.

We are owners of one of the oldest herds of Registered Holstein-Friesians in the State of Michigan, and can honestly recommend Perma-Guard products to anyone. We know this, that we would surely dislike to be without Perma-Guard Products. They have helped us in many ways.

Sincerely yours,
POTTER BROTHERS
